External Education Replication

External Education Replication was designed to replicate the education data entered into SIS for students who have applications and/or prospects at multiple IU campuses.

In order for the data to replicate, the following conditions must be met:

- The application and/or prospect must be for the career "UGRD"
- The **Action** on the External Education panel must = "Received"
- The **Date Received** on the External Education panel must not be blank
- The **Date Received** on the External Education panel must not be greater than six months old
- The **Data Source** on the External Education panel must not be "self-reported"

External Education Replication

The External Education Replication job runs once an hour. The data only needs to be added for one campus and will replicate for any other campus with an application or prospect in the system at the time the data is added to/updated in SIS. The data will also be replicated for any application or prospect that is added to SIS after the education data has been added to/updated in SIS. This data will replicate for any applicants/prospects for the current term and all future terms when it is added to/updated in SIS.

The following data will be replicated:
